Design: *Figma | Adobe Illustrator*
Others: *Accessibility | Version Control | E2E Testing | Debugging | Cross-Browser Compatibility | Communication | Collaboration | Performance Optimization*

WORK EXPERIENCES
Eazyfit   **January 2025 - Present**
Co-founder | Technical Lead   **Remotely**
Eazyfit is a fashion e-commerce platform that addresses the common "what I ordered vs. what I got" issue by connecting customers with trusted fashion designers at an affordable prices.
- Led a team of 3 developers and we built and launched a cross-platform mobile application that achieve 2,500+ downloads on Google Play and Apple App Store cumulatively.
- Defined and implemented the frontend architecture, using Redux Toolkit, Axios, and Socket.IO to support real-time functionality while ensuring good code practice and timely feature delivery.
- Integrated push notifications and real-time chat features to improve users engagement and app interactivity.
- Managed the full development lifecycle, from UI/UX collaboration and coding to deployment, testing, and maintenance.

Algohub   **Aug 2023 - Sep 2024**
Intern Frontend Developer | Brand Designer   **Kwara, Nigeria**
- Designed brand materials including logos, color palettes, flyers and consistently maintaining the company's website and creating landing pages.
- Independently developed a full-stack cross platform mobile app using React Native, Node.js, Express, and MongoDB that allows users to copy trading activities and subscribe to monthly plans via integrated payment systems.
- Managed user authentication, real-time data sync, and secure payment flows, delivering a ready-to-launch MVP.

VOLUNTEER ACTIVITIES AND EXTRACURRICULARS
Nigeria Population Commission   **Dec 2022 - Aug 2023**
Data Quality Mananger   **Osun, Nigeria**
- Supervised enumerators, supervisors, and data entry officers, conducting field visits to verify proper data capture and flagging cases of tampering or irregularities.
- Trained field staff on data quality standards and tools including CAPI devices, GIS tools, and mobile data collection systems (ODK, CSPro).
- Conducted data validation, anomaly checks using satellite imagery, and dashboard analytics.
- Collaborated with NPC HQ, zonal coordinators, and international partners (e.g., UNFPA, World Bank) to align with global data quality standards.

PROJECTS
AptBooking   **ReactJS | MongoDB | ExpressJS | Node | Typescript**
FullStack Web Engineer   **View Project | Github**
I collaborated to designed and developed AptBooking, a full-stack web platform that simplifies the booking of shortlet apartments.
- Built the frontend using React.js, TailwindCSS and TypeScript, focusing on a responsive, user-friendly interface.
- Developed the backend with Node.js, Express, and MongoDB, implementing secure user authentication and booking management.
- Conducted end-to-end testing to ensure good functionality across the entire web application flow.
- Delivered a fully functional MVP with features such as apartment listings, availability search, user sign-up/login, and booking confirmation.
